LED BATHROOM MIRROR

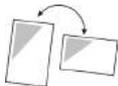

Symbols Used

LED illumination

Custom sizes available

Portrait or
landscape orientation

IP44 rating

Proximity switch - option

The proximity light switch reacts to motion near a sensor integrated into the mirror casing. A hand movement in front of sensor turns on the illumination. Another movement turns it off.

Touch switch – option

An additional light switch reacts to finger touch on a sensor integrated into the mirror casing or surface. Touching the sensor turns on the illumination. Another touch turns it off.

Touch switch with light intensity adjustment – option

An additional light switch reacts to finger touch on a sensor integrated into the mirror casing or surface. A short touch turns on illumination at full brightness. Another short touch turns it off. Touching the sensor and keeping the finger on it turns on the illumination at full brightness and then gradually reduces the brightness of the lights until they are off. Taking the finger off the sensor while dimming the light interrupts the brightness reduction. When the lamps are on, touching the sensor and keeping the finger on it results in a gradual increase in the brightness until reaching full light intensity. Taking the finger off the sensor while making the lights brighter interrupts the brightness increase.

Extra Features

In addition to the general features in the marketplace, we also offer many other extra unique additional features. We have been innovative, and an increasing number of new features are coming soon.

All-in-One

Now buy one mirror, you can complete all your needs in the bathroom, just like you would get a total control, and achieve maximum convenience.

Time Display

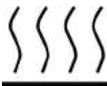

Bluetooth Speaker

**BATHROOM MIRROR
WITH LIGHT
ANTI-FOG HEATED**

IP Rated	IP44
Wattage	24W
Lumen	1850LM
Light Source	LED SMD Chips
Input Voltage	120V-277V AC 50/60Hz
Color Temperature	2700K-6500K
CRI	> 80
PF	>0.98

Light Aluminum Alloy Edged Frame

Dimensions:

H. x W. x D. mm
900x700x40 mm
600x800x40 mm
